- Collaborated with a team of 5+ developers using Git for version control

Projects

E-Commerce Platform **Vercel**

A full-featured e-commerce web application built with Next.js, supporting 6+ product categories, featuring 5 core modules (cart, Wishlist, authentication, order history, and filtering), and fully responsive across all screen sizes. Next.js and deployed on Vercel. Fresh Cart supports multi-category product browsing (Electronics, Fashion, Beauty, Home, etc.), product filtering by brand and category, discount/sale badges, customer ratings, Wishlist, shopping cart, user authentication (login/register), order history, and a newsletter subscription system. The app is fully responsive with a modern UI and includes sections for featured products, promotional banners, and a mobile app download CTA.

Tech: Next.js, React, REST API (Route Academy), Vercel, Responsive CSS

Social App [Vercel](#)

A social networking single-page application built with React. The app provides a social feed experience with user interaction features, deployed on Vercel as a fully client-side React SPA. deployed on Vercel as a fully client-side React SPA with under 2-second load time.

Tech: React, JavaScript, Vercel

Photography World-(Adasa) [Vercel](#)

A photography-themed web application Adasa Built as a React SPA, the app is focused on the world of photography — likely featuring photo galleries, categories, or photography-related content, deployed on Vercel.

Tech: React, JavaScript, Arabic RTL support, Vercel
